

# Python\_Activity8.1

## Activity 1: Sum of Positive Numbers

### Problem Statement:

Create a Python program that keeps asking the user to enter positive numbers. The program should:

- Use a `while` loop to continuously accept numbers.
  - Stop when the user enters a negative number.
  - Display the sum of all positive numbers entered before exiting.
- 

## Activity 2: Even and Odd Numbers Counter (For Loop with Continue Statement)

### Problem Statement:

Write a Python program that:

- Asks the user for a **starting number and an ending number**.
- Uses a **for loop** to iterate through the range.
- Uses a **continue statement** to skip even numbers and count only **odd numbers**.
- Displays the count of odd numbers in the given range.
