

Python_Activity10

Activity 1: Dictionary Challenge - Student Grades Tracker 🎓

Problem Statement:

Create a **Student Grades Tracker** that allows users to **add, update, remove, and view** student grades.

Steps to Follow:

1. Create an **empty dictionary** called `grades` .
 2. Ask the user to **add 3 students** with their respective grades.
 3. Allow the user to **update** a student's grade.
 4. Allow the user to **remove** a student from the dictionary.
 5. Display the **final student grades**.
-

Activity 2: Set Challenge - Unique Words Finder 🔍

Problem Statement:

Create a **Unique Words Finder** that takes a sentence and extracts all the **unique words**.

Steps to Follow:

1. Ask the user to enter a **sentence**.
2. Convert the sentence into a **set of words** (to remove duplicates).
3. Display the **unique words** in the sentence.
4. Allow the user to **add a new word** to the set.
5. Allow the user to **remove a word** from the set.
6. Display the **final set of words**.

Note:

- *Give me your best output*
- *Add what you think is needed*
