

Class_Act21

Activity 21: Pet Tracker with Two Methods

Objective:

Learn how to define a Python class, create objects, and use multiple methods.

Instructions:

◆ Part 1: Create a Class

1. Create a class called `Pet`.
2. Add an `init()` method with these attributes:
 - `name`
 - `species`
 - `trick`
3. Add **two methods**:
 - `show_info()` → prints:
 - `css`
 - Copy code
 - `[name] is a [species] and can [trick]!`
 - `make_sound()` → prints a sound based on the species:
 - Dog: “Woof!”
 - Cat: “Meow!”
 - Bird: “Tweet!”
 - Else: “(Unknown sound)”
