

Python_Activity 14.2

Group Activity: Employee Payroll System (Using Functions)

Objective:

Each group (5 members) will collaborate to create an **Employee Payroll System** using **functions** in Python. The system should:

1. **Store employee details** (Name, Department, Hours Worked, Hourly Rate).
 2. **Calculate salary** based on hours worked and hourly rate.
 3. **Display payroll details** for all employees.
 4. **Allow updates to employee details.**
 5. **Ensure modularity using functions.**
