Python_Activity10.2

Activity 3: Movie Collection Manager 🎬

📌 Problem Statement:

1. Ask the user to enter **3 favorite movies** and their **release years**.

2. Ensure **no duplicate movie titles** using a **set** before adding them.

3. Store movies in a **dictionary** where the movie name is the key and the release year is the value.

4. Allow the user to **remove a movie** from the collection.

5. Display the **updated movie dictionary and unique title set**.

Note:

- *Give me your best output*

- *Add what you think is needed*
